

## Hackathon\_2024

How exciting is this?! You can now sign up for the ING Global Hackathon happening on 13 and 14 March 2024!

How to register?

1. Click [here](#) to get familiar with the topics and decide which one you want to hack.
2. Think of the skills you need in your team to successfully hack the chosen topic and to #ActAsOne. Build a team of 2 to 8 colleagues and appoint your team captain.
3. The team captain can register their team until 2 February 2024 via the button below, no matter the country you're registering from.
4. The whole team will receive a registration confirmation email. Soon after, all team members will receive an additional email that asks to complete the individual profiles on our registration platform.

Less than 90 days: The 24hr ING Global Hackathon countdown is on!

Dear colleague,

In less than 90 days from now, on 13 and 14 March 2024, we will host our next 24hr ING Global Hackathon!

With this global hybrid hackathon, we aim to come together to #ActAsOne, boost your creativity, and give you the flexibility to come up with great solutions for ING-wide challenges. During the hackathon you therefore have the opportunity to hack on one of the following five topics:

1. Moving to public cloud
2. Moving to ICHP
3. Improving ING's security
4. Reducing manual work
5. Boosting sustainability through Green IT

What do you need to do now?

The answer is short: save the dates in your calendar, stay tuned for the registration email to follow soon, and think about whom you would like to team up with.

Until then, I wish you a lovely holiday period and the Hackathon Organising Committee is looking forward to organising a great hackathon for all of you.
